

OTR RETREAD & REPAIR

PRODUCT

CATALOG

OUR COMPANY

For over four decades, we have provided our customers with a quality of product that can only be achieved through honest hard work and dependable service.

We continue to reinvest into our business by advancing our technology and training, in order to exceed market standards and deliver new and perpetual capabilities for the OTR industry.

OUR MISSION

To bring value to our products through the building of business partnerships. Expanding our roles as not only a retread and repair provider but offering viable and reliable services throughout the life of a tire.

SCULPTURE RETREAD

(Loader/Articulated)

Customized tread designs, rubber compound selections, and the capabilities for retreading foam filled and solid tires makes sculpture retreading the most diverse option available on the market today.

- Causes less casing deterioration than other retreading options, which allows the possibility of retreading a casing multiple times.
- H&H can develop the best fit for specific applications to provide the best cost per hour.

Tread Designs: *More Patterns Available Upon Request*

MODIFIED SCULPTURE RETREAD

(MSR)

The modified sculpture retread was developed here at H&H in order to give the sculpture retread more of a new tire look.

- MSR gives the tread face and shoulder a textured finish and eliminates the strip line appearance.
- Available for every size / tread design

NEXUS PRECURE RETREAD

The premier style of OTR retreading that offers excellent appearance as well as performance.

- Less heat build up and less casing deterioration compared to Mold retreads
(No cracking on the sidewall/shoulder area)
- Foam Filled & Solid Tire capability
- H&H Industries would like to announce a major investment in our retread process by acquiring 18 OTR molds in varying tread designs capable of retreading tire sizes from 24" up to 35/65-33 and 27.00-49 from Continuum.

H&H has been leading innovations in the precure market for more than 20 years

STOCK INVENTORY

H&H Industries carries the largest inventory of used tires and casings in the nation.

Used Tires: Economical option for saving money. Can use specifications to correspond with other tires on a machine. Used for spares when customers need to replace a tire with an injury.

Stock Casings: Great alternative to replace rejected casings. Can be ordered to supply wheel positions. Cuts turn time down due to on the spot availability.

OTR CERTIFIED REPAIRS

H&H Industries maintains the highest quality repair standards through constant training and certification.

- Everything from standard spot & section repairs, to cable replacement
- Capable of salvaging damaged tires that others cannot
- H&H invests in training to offer maximum safety
- Multiple manufacturer repair certifications:
 - ✓ **REMA TIP TOP**
 - ✓ **PATCH RUBBER**
 - ✓ **TIRE REPAIR SOLUTIONS**

ULTRASOUND TIRE SCANNING

Non-Invasive tire inspection

- Only OTR ultrasound inspection in the Nation

LOGISTICS / SERVICE

H&H Industries carries a full fleet of specialized trailers for fast, dependable, & hassle-free service

- Booms fitted and mounted on step deck cage trailers
- Aluminum flat bed trailer for solid tires / heavier weights
- Custom designed double drop trailers for hauling oversize tires

At H&H, the service we provide to our customers is one of our biggest priorities. We deliver products in a timely manner, with the fastest return time in the industry. When our trucks arrive, your products will be there, not four weeks out. We also offer emergency services to certain areas for when your customers need a tire ASAP.

- Noah Hickman (President/CEO)

Why Chose Us?

H&H Industries is leading the way and setting the standards in the OTR repairing, retreading, and used tire industry.
